Personal Details

- Date of Birth : 01/01/1994 in N'Djamena (Chad)
- Marital Status : Single
- Nationality : Chadian

Profil

- Graduate with a professional bachelor degree in Hydrocarbon Exploitation option Oil and Gas Production. I have a technical operator's in the oil chain from exploration to process of petroleum products, that's say from upstream to downstream.

Objective

After 3 years of professional license training in Hydrocarbon Exploitation, oil and gas production option at the Mao National Higher Petroleum Institute and one year of professional experience at the China Petroleum Pipeline Engineering Company, through these technical and practical skills I would like to acquire new knowledge in this environment and related areas in order to improve myself and be operational for the benefit of the development of your our (if possible) company.

Education

- **Higher National Petroleum Institute of Mao** 2017 - 2020
Professional bachelor's degree in Hydrocarbon Exploitation option Oil and Gas Production
13,34/20
- **Goudji Center high school at N'Djaména** 2012 - 2016
Scientific baccalaureate
11,44/20
- **Higher National Petroleum Institute of Mao** 2017 - 2019
Computer skills/Microsoft
- **Oasis Culturel Center** 2019 - 2020
Level 1 to 3 of English Language
- **Cambridge English Center** 2021 - 2022
Intermediate level to advanced level
- **Online formation with Ahmed Algarhy** September 2021 - December 2021
Introduction to well control, having fun learn English

Experience

- **China Petroleum Pipeline Engineering Co., Ltd.** 12/12/2022 - 28/04/2024
Field operator In Heating Station (HS2)
Duties:
 - Daily , weekly, monthly and yearly reports activities to supervisor and Main control center;
 - Start and pumps, heating furnace, Wilson and CAT generator, tank gauging;
 - Day shift/night shift works, daily pipeline inspection to detect abnormalities;
 - Switch generator and daily maintain in operation;

- Switch process operation of pig from from to receive process and take pig from receiving bucket;
 - Monitor the parameters on SCADA screen and control the flow of oil and gas.
- **Chad Downstream Petroleum Sector Regulatory Authority** 10/08/2021 - 11/09/2021
Trainee internship
 - **Petroleum Product Distribution Company** 23/06/2020 - 25/07/2020
Trainee internship
 - **Ministry of petroleum, mines and energy** 10/09/2019 - 11/10/2019
Student internship
 - **China Petroleum Pipeline Engineering Co., Ltd.** 30/04/2024 - 04/07/2024
Traineeship in Kome terminal station (KTS)
Duties:
 - Daily, nomination, events, weekly, monthly and yearly reports activities to supervisor and Main Control Center;
 - Start and Stop the pumps (Booster, Main, Reflux and reverse);

 - Downloading diesel from T0722 to T0721 or T0723 to T0722;
 - Transferring the diesel from truck to tanks;
 - Start and Stop the crude oil exportation;
 - Increase/Decrease the output volume;
 - Take the sample in sampling point;
 - Day shift/night shift works, daily pipeline inspection to detect abnormalities;
 - Switch process operation of pig from normal process to receiving process and take pig also from receiving to normal;
 - Monitor the parameters on SCADA screen and control the flow of oil and gas.
 - **China Petroleum Pipeline Engineering Co., Ltd.** 05/07/2024 - Until now
Dispatcher in Main Control Center (MCC)

Skills

- Exploitation of hydrocarbon: research, deposit development and production.
- A good knowledge of underground and surface production like OGMs equipments, CPF and FPF.
- A good level of the English language
- Good knowledge of office software and willingness to learn
- Job organization and know the safety rules for field operator
- Team work and collaboration
- Start, check and stop the heating furnace
- Start, stop check and switch the generators like Wilson or CAT.
- Switch the transportation process from normal to pig receiver process/ from receiver to normal/ normal to pig launching process/ from launching to positive transmission and take pig.
- Petroleum production and transportation process
- Control and monitor the status of valves and pumps from the Control room
- Accurately monitor pressure, flow, tank levels and other operating parameters
- Check the parameters like temperature, pressure, flow rate and level.

Computer Knowledge

- Microsoft Word, Excel, PowerPoint, Publisher, SCADA and Internet

Interests

- Sports : Football and footing
- Travel and formation
- Reading

Languages

- French: fluent (read, write and speak)
- English: high level (read, write and speak)
- Arab: Good level
